# How to install font to EuroScope

1. Open settings

- Click on the start menu and select "Settings" (alternatively, you can press the windows + I key)

2. Select "fonts"
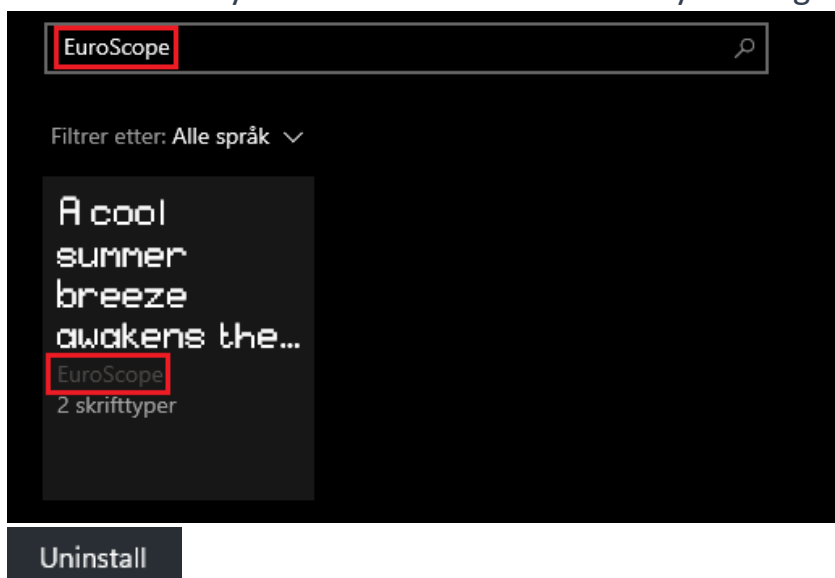

- Choose "personalization" from the list of options in settings
- Then choose "Fonts" in the left side

3. Delete fonts

!NOTE!: If you never installed or have font for EuroScope before skip this part and continue with (PART 4).

- Search for EuroScope in the search area, then choose the font you are using for EuroScope and click on it once
- Click on the "Delete" button under the font
- Confirm that you want to delete the font by clicking "Delete"

4. Install font
   - Install EuroScope_Costum_font
   - Click on the "Add a font" button in fonts
   - Select EuroScope.ttf to install from the location specified on your computer
   - Click "OK" to complete the installation

If you want to use the original EuroScope font again just install EuroScope_Orginal_Font and do all steps in this document again!

This should help you delete and install fonts via settings in Windows 10. Note that there may be slight variations in the steps depending on the version of Windows you have installed.

5. **Support**

   If you have any questions about fonts, send a message to #atc-chat.
